

**Are you a civil servant in the Middle East and Northern Africa (MENA) region, or do you work for a semi-public organisation in that region? If so, please register for a professional development training course on Energy Transition: the Built Environment**

**Who is the course for?**

We invite professionals<sup>1</sup> who are committed to advancing public services in the Energy Transition, with a focus on the Built Environment, to apply for this training course. This is a unique opportunity to exchange knowledge, gain inspiration from international peers, and contribute to solutions shaping sustainable energy and infrastructure development.

This training course is for civil servants and employees of semi-public organisations in the target countries of Algeria, Egypt, Iraq, Jordan, Lebanon, Libya, Mauritania, Morocco, Oman, Palestinian Territories and Tunisia.

Applicants should have 5 to 10 years of relevant work experience in energy transition, urban or rural planning, infrastructure, or related fields within the Built Environment. Please note that participation in Shiraka training is limited to one programme, so you may only apply if you have not previously attended a Shiraka course.

Since we value diversity among our participants, we encourage women to take part.

This training programme is part of the 'Shiraka' training programme, an initiative of the Ministry of Foreign Affairs. Shiraka aims to strengthen and improve bilateral relations between the Netherlands and the MENA region in the public sector and offers an opportunity to improve public services through reciprocal inspiration. For more information on the Shiraka Training Programme please watch this [video](#).

<sup>1</sup> Civil servants are the main target group. However, a limited number of places are available for participants from semi-public organisations. We welcome participants from organisations that are closely linked with public actors in the relevant field, play a direct or active role in the value chain, or are directly affected by policy development and therefore have a good reason to be involved.

## Training course goals

This Energy Transition (Built Environment) training will:

- Develop your knowledge and understanding of an integral and multi-sectoral energy transition;
- Empower you with the required skills to formulate and implement effective energy policies via public-private partnerships and a multidisciplinary approach to the energy transition;
- Develop a valuable network of peers in your region, country and in the Netherlands;
- Stimulate cooperation between the Netherlands and the Arab region, as well as intraregional cooperation;
- Strengthen your connections with the Netherlands and stakeholders in the Dutch Energy and Built Environment sectors;
- Help you share your acquired knowledge and skills regarding energy transition in your home country.

## Training course topics

The training course covers the following topics:

- Energy Markets and Sustainable Supply;
- Innovation in the built environment;
- International Trade and Climate Governance;
- Project and Process Management;
- International Negotiations;
- Intercultural Communications;
- Presentation Skills, Networking, Stakeholder Mapping and Effective Influencing;
- Back-Home Action Planning;
- Working visits to companies and organisations active in the Energy Transitions and the Built Environment in both the Netherlands and Egypt.

## Training course details

- Since all the sessions are in English, we recommend an intermediate level of English;
- Live interpretation during meetings and sessions into Arabic and/or French is available;
- We can offer the training course to 25 people. We will allocate these places to the participating countries based on the quality of the applications;
- The entire training course will last for 2 weeks (10 working days). We expect you to attend all sessions;
- Study visits and social activities are part of the training course;
- You will receive a certificate of participation upon completing the course.

### Training course itinerary

The training course will be in 2 parts, and held at 2 locations:

	Dates	City	Country
<b>Part 1</b>	2-6 June 2025	The Hague	The Netherlands
<b>Part 2</b>	22-27 September 2025	Cairo	Egypt

Part of the course may take the form of blended learning (partly online, partly offline).

If international health and travel restrictions make it impossible to hold a training session in the Netherlands, an alternative will be offered. This may be an online training.

If the training is held online, we expect participants to have good computer skills, access to an adequate computer with a recent operating system and a good internet connection (participants must be able to use Zoom, Word, PowerPoint etc.).

### For all participants

- You must organise and pay for your journey to the airport in your home country.
- You are responsible for organising your visa in your home country.

### Costs for participants from countries on the [OECD-DAC list](#)

- The Dutch government will cover all relevant costs. This includes international travel, accommodation, meals during training days, visa and insurance and tuition fees.
- If you travel from an international airport outside your home country, you will need to cover local travel costs yourself. You will receive compensation for the international leg of your journey.

### Costs for participants from countries not on the [OECD-DAC list](#)

- You must organise and pay for your own international travel and visa.
- The Dutch government will cover the cost of accommodation, insurance and tuition fees.

### No-show or cancellation costs

- If you cannot attend or cancel your participation within 4 weeks prior to the training course, the organisation has the right to claim all the associated costs from your employer.

## How to apply

- Applications should be made online before **11 March 2025**.
- Visit our [Shiraka training courses overview](#) and select the course of your choice by clicking on 'apply'.
- [Log in](#) or create an account using the '[register](#)' button.

The Hague, the Netherlands

## Information on the training course

### Experts

Experts who are involved in this training course

**Caspar Wanders** is Programme Fellow at Clingendael. He coordinates training programmes for diplomats and other civil servants from the Middle East and North Africa. He is also a trainer on Negotiations, Project Management and topics related to Sustainable Development.

**Stella Pfisterer** is researcher at the Rotterdam School of Management at Erasmus University and an accredited partnership broker. Her research focuses on the governance, management, facilitation and monitoring of partnerships and collaborations between governments, businesses and civil society organisations.

**Pier Stapersma** is Deputy Director at the Centre for International Energy Policy (CIEP). Pier is an expert on international energy markets and systems and on business strategy in the energy transition.

### Study visits

During the training course the following study visits may be organised

To **Rotterdam Port Authority**, which manages, operates and develops the port and industrial area of Rotterdam.

To **FMO**, which is the Dutch entrepreneurial development bank. Its mission is to enable entrepreneurs to increase inclusive and sustainable prosperity.

To the **World Horti Center**, which is the global knowledge and innovation center for international greenhouse horticulture.

### Back Home Action Plan

During your participation in the training course you will work on a Back Home Action Plan (BHAPs). Hereunder you find a few examples of the BHAPs participants worked on in the past.

During your participation in the training course you will work on a Back Home Action Plan (BHAPs). Hereunder you find a few examples of the BHAPs participants worked on in the past.

Use lessons learned from sessions on country branding and public diplomacy to develop promotional (video) material for a country's trade promotion agency.

Launch a pilot to share trade and investment promotion strategies from the training with the Ministry Trade And Industry.

Organise workshops for Small Medium Enterprises on Market Analysis tools using lessons from the training.

**"A great opportunity to learn different insights on the energy transition and to exchange and collaborate with a diverse group from different countries, ministries and backgrounds"**
